

WRIGHT PATTERSON AFB

★ CLIENT PROFILE

Wright-Patterson AFB, located in Dayton, Ohio, is “one of the largest, most diverse, and organizationally complex bases in the Air Force” with a long history of flight test spanning from the Wright Brothers into the Space Age. It is the headquarters of the Air Force Materiel Command, one of the major commands of the Air Force. “Wright-Patt” (as the base is colloquially called) is also the location of a major USAF Medical Center (hospital), the Air Force Institute of Technology, and the National Museum of the United States Air Force, formerly known as the U.S. Air Force Museum. It is also the home base of the 445th Airlift Wing of the Air Force Reserve Command, an Air Mobility Command-gained unit which flies the C-17 Globemaster heavy airlifter. Wright-Patterson is also the headquarters of the Aeronautical Systems Center and the Air Force Research Laboratory.

THE CHALLENGE

FSM was in the right place at the right time when asked to refurbish parts the C17 Globemaster stationed at Wright-Patt. In keeping with the highest standards, FSM was able to produce the parts to order and to the customer’s satisfaction.

AND THEN SOME...

In an effort to instill team pride, FSM took the time to embroider all the parts with Wright Patterson logos. This work not only represents the “And Then Some” philosophy at FSM, but recognizes and gives a nod to the honor due such a respected and long-serving aircraft and the men and women in uniform.
