

SKYPAXXX

★ CLIENT PROFILE

SkyPaxxx is a provider of aircraft seating and interior services. Servicing the aircraft industry with aesthetically pleasing and environmentally-efficient interiors is their goal. Their specialized niche is in their ability to refurbish a part to give the look and feel of one that is brand new.

THE CHALLENGE

FSM was sought out to manufacture seat cushions for commercial aircraft. Our product engineering services created pattern designs for the prototyping of various seat cushions that would possess numerous commercial applications. FSM was able to provide quality, competitive services in this vertical, well-defined market.

AND THEN SOME...

FSM was able to design a product that was replicable across numerous airline families and provide the customized embroidery services that help brand the product as a standout among its competitors.
